Asset Control System (ACS)

Organizations today must exercise control over their assets to ensure efficient operations, accurate financial reporting, and regulatory compliance. With new regulations such as Sarbanes Oxley and the Health Insurance Portability and Accountability Act compelling businesses to better manage and report on their assets and sensitive data, pencil and paper or manual spreadsheet based processes are no longer a viable option for these tasks.

LowryTrack ACS is a comprehensive solution suite that automates and streamlines asset management for all of your organization's essential assets including:

- IT equipment
- Fixed assets such as furniture and fixtures
- Physical records and files
- Machines, tools, and dies
- Reusable containers and transport items
- Work in process assets and finished goods
- And the rest of the equipment your business depends on every day

LowryTrack ACS makes asset tracking easy by utilizing the latest technology including RFID, barcodes, mobile computers, and GPS technology for automated data collection. This allows for quicker, more accurate asset audits while substantially reducing the labor required. It also helps by eliminating the element of human error commonly associated with manual processes. On average, LowryTrack ACS customers report 99% inventory accuracy with a 90% reduction in physical inventory effort. In addition, more than 95% of our clients also report that their projects obtain projected ROI in less than 12 months.

Developed, implemented, and supported by Lowry Solutions, a company with 40 years of experience in asset tracking and other data collection solutions, LowryTrack ACS enables you to take control by automating the physical inventory process and providing detailed real-time tracking of all asset details including location, status, and condition from acquisition through disposal. LowryTrack ACS keeps a detailed, auditable history of your fixed assets throughout their lifecycle including procurement, deployment, moves, updates, reallocations, and disposal processes.
LowryTrack ACS Editions

LowryTrack ACS comes in several editions designed to scale from smaller straightforward implementations to complex enterprise deployments.

LowryTrack ACS Features

ACS Web
- Web application for easy access and maintenance
- Complete as set transaction history
- Track as sets by location, department, type, serial #
- Import / export assets
- Batch data entry and mass updates
- Upload file attachments and view asset images
- Manage asset work orders
- Asset lifecycle event notifications
- GS1 EPC Standard RFID serialization
- Saved search shortcuts
- Sort and filter search results
- Configurable search form fields and wildcard search
- Browse assets by location
- Graphical floorplan & map views

ACS Mobile
- Designed for RFID and barcode
- RFID asset locator
- Add new assets
- Audit assets
- Realtime and disconnected batch operating modes
- Move assets
- Update asset details
- Record asset lifecycle transactions
- Encode RFID Tags
- Supports Motorola handhelds with Windows Mobile 5+

Scalability & Security
- Unlimited assets
- Unlimited locations
- Unlimited user defined fields with data validation
- Unlimited user defined menus
- Unlimited user defined asset lifecycle transactions
- Unlimited user defined asset types
- Configurable location hierarchy
- Role based permissions
- Configurable security by department
- Active directory authentication (LDAP)
- SOAP web services API
- Includes Microsoft SQL Express database
- Installable on existing Microsoft SQL Service database
- Supports high availability deployment

Standard Asset Lifecycle Transactions
- Create
- Update
- Move
- Ship
- Receive
- Vendor service
- Transfer (with request and approval)
- Check-in and check-out
- Schedule and execute audits
- Missing
- Found
- Retire
- Dispose
- Delete

Standard Reports
- Assets without labels
- Assets without RFID tags
- New asset acquisitions
- Asset disposals
- Audit report
- Asset details with photos
- Asset inventory
- Asset inventory detail
- Asset status
- Custody transfers
- Missing assets
- RFID tag expiration
- Shipments
- Warranty expiration

Supported Data Types
- Text (alphanumeric)
- Long text
- Number
- Numeric range
- Date (any date, future date, past date)
- Registered user accounts menu
- Active directory user accounts menu
- Auto-increment
- Signature capture
- Departments menu
- Locations menu
- Assets menu
- Yes/no boolean
LowryTrack ACS Features (cont.)

Optional Modules

- Asset Labelling - Print barcode & RFID labels with ACS and ACS Mobile
- Fixed RFID Interface - Automated asset location tracking
- Asset Management Dashboards - Metrics reporting and analysis

LowryTrack ACS System Requirements

<table>
